

LEBANON: Flash Update #23

Escalation of hostilities in South Lebanon

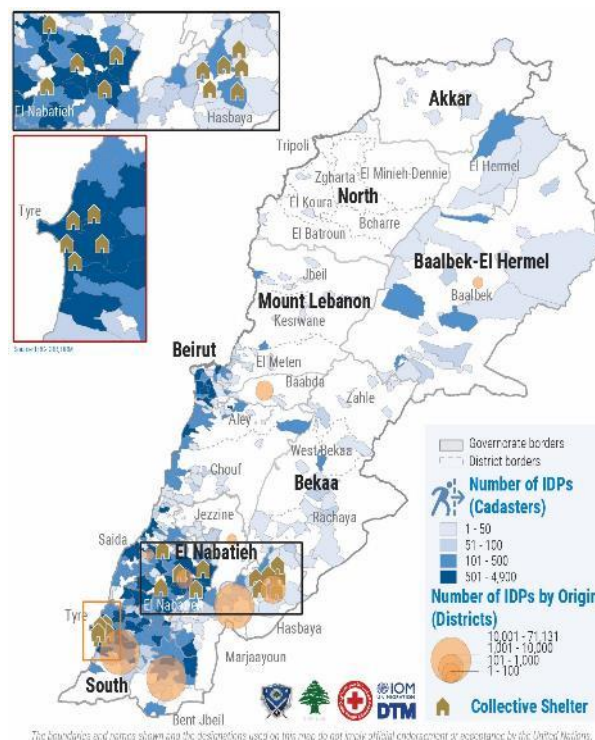

as of 24 July 2024

HIGHLIGHTS

- 98,750 individuals (51% females) have been displaced from South Lebanon due to the ongoing hostilities as of 23 July (source: DTM).
- 1,953 casualties have been reported, including 481 deaths. Among these, at least 107 civilian deaths have been confirmed (source: MoPH, OHCHR).
- On 15 July, two women were killed in an Israeli airstrike in Bint Jbeil, Nabatieh.
- On 16 July, five civilians of Syrian nationality, including three Syrian refugee children were killed in two Israeli airstrikes in South Lebanon. UNICEF in Lebanon called the attack horrific and emphasized that children must be protected under international humanitarian law.

DISPLACEMENT MAP – up until 23 July 2024

SITUATION OVERVIEW

Lebanon continues to be severely impacted by ongoing hostilities, with daily exchanges of fire across the southern border. The most intense bombardment is concentrated within 12 km of the Blue Line, while targeted Israeli airstrikes reach deep into the country, extending up to 100 km from the border.

Severe damage to water, electricity, and telecommunications infrastructure, as well as roads in southern Lebanon have been recorded, and maintenance and repair workers have been killed and injured as they attempted to maintain services for the area's remaining residents, alongside medics and first responders. There has also been a noticeable increase in Israeli warplanes breaking the sound barrier over various Lebanese regions, resulting in widespread panic and the shattering of glass in many residential buildings.

To date, at least 107 civilians have been killed since hostilities escalated in October 2023. According to the Lebanese Ministry of Public Health (MoPH), the total number of casualties since October 8, 2023, stands at 1,953, including 481 fatalities.

- On 15 July, two women were killed in an Israeli airstrike in Bint Jbeil, Nabatieh.
- On 16 July, two civilians of Syrian nationality were killed in an Israeli drone airstrike in Khardali, Nabatieh.
- On 16 July, three Syrian refugee children were killed in an Israeli drone strike in Um Tout village, Tyre. UNICEF in Lebanon called the attack horrific and emphasized that children must be protected under international humanitarian law.

Additionally, on 16 July, the Lebanese Ministry of Telecommunications announced on X that it had filed a formal complaint against Israel regarding purported GPS jamming that endangers civil aviation in the country. The complaint was reportedly directed to the United Nations and the International Telecommunication Union (ITU) for consideration, through the Ministry of Foreign Affairs.

As of 9 July, 98,750 people have been internally displaced and are seeking refuge across Lebanon, with 97 per cent originating from Bint Jbeil, Marjaayoun, and Tyre districts.

- Some 82 per cent of the IDPs are currently living with host families, while 15 per cent are renting houses. Another two per cent have relocated to secondary residences. Around one per cent are housed in 16 collective shelters.
- Of the 82 percent in host settings, 25,276 are co-living with non-internally displaced families, while 55,790 reside separately. Notably, according to IOM, 20 percent of the 81,006 individuals in host settings live in overcrowded conditions.
- 1,341 displaced people are hosted in 16 collective shelters, with five located in Tyre, six in Hasbaya, four in Nabatieh, one in Saida.
- 33 percent of IDPs are children (< 18 years), while 34 percent are female adults and 33 percent are male adults.

Since February 2024, and up to 24 July, 42 humanitarian missions have been conducted to towns and villages along the frontline. According to the Disaster Risk Reduction unit, at least 149,000 civilians remain within 10 km of the Blue Line.

COORDINATION AND PREPAREDNESS

Led by the Prime Minister, the Presidency of the Council of Ministers oversees national preparedness and response efforts, supported by the National Disaster Risk Management (DRM) Unit. At the sub-national level, Governors coordinate with local authorities for preparedness and emergency response. Meanwhile, UN and NGO partners under the leadership of the Humanitarian Coordinator and in complement to the government-led response, continue to accelerate response and preparedness activities. As outlined in the Humanitarian Country Team (HCT) contingency plan, humanitarian partners are currently carrying out an emergency response to the humanitarian impact of the escalation in Southern Lebanon, under the 2024 Lebanon Response Plan (LRP). The plan also identifies a need for USD 72.4 million for a three-month response to support up to 200,000 people in need of humanitarian assistance. Despite the limited available funding, humanitarian actors continue to provide life-saving assistance to meet the needs of the most vulnerable affected communities. However, support for people remaining in frontline areas remains limited due to many challenges, including funding, access, and security constraints.

On 18 July, the HCT met to review ongoing response and emergency preparedness priorities for the response to the escalation of hostilities. Key priorities noted by the HCT for further action include planning for sustained response at the current level of impact through the end of the year, critical minimum and advanced preparedness actions to increase humanitarian readiness in the event of escalation, and collective efforts to strengthen resource mobilization for both ongoing response and emergency preparedness priorities.

On 24 July, the Logistics Working Group convened a meeting to discuss minimum and advanced preparedness measures to facilitate procurement, delivery, storage and distribution of emergency relief items in addition to clarifying customs procedures.

HUMANITARIAN NEEDS AND RESPONSE

Cash Assistance:

Cash for Basic Assistance and Food Security & Agriculture:

- In November 2023, an emergency cash transfer was disbursed to all children and youth with disabilities, aged 15 to 30, who were registered under the National Disability Allowance program across seven districts in the South and Nabatieh governorates. This initiative, conducted in partnership with the Ministry of Social Affairs (MoSA), assisted 1,972 Lebanese individuals as part of shock-responsive social protection, along with 1,892 Syrian, Palestinian, and other refugees.
- In December 2023, 16,500 Syrian refugee families residing in Nabatieh, Bint Jbeil, Hasbaya, Tyre, and Marjaayoun received one-time cash for food assistance.
- In January 2024, 18,640 vulnerable Lebanese households registered in the MoSA social safety net databases, yet presently not receiving assistance, were provided with a one-time emergency cash transfer to address their essential needs across all seven districts of South and Nabatieh governorates. The total value of assistance amounted to USD 2.1 million.
- As of May 2024, 8,473 households benefited from emergency cash grants to cover basic needs (non-food), in Nabatieh, South, Beirut and Mount Lebanon, and 5,093 refugee families residing in Tyre, Nabatieh, Marjaayoun, Hasbaya and Bint Jbeil districts and not already benefiting from existing cash programs were provided with multi-purpose cash assistance to meet their food and non-food needs.
- In June 2024, 11,884 poor and vulnerable Lebanese households registered within the Ministry of Social Affairs (MoSA) social safety net databases received emergency cash assistance across the seven districts of the South and Nabatieh governorates, and 5,599 refugee families residing in Tyre, Nabatieh, Marjaayoun, Hasbaya and Bint Jbeil districts not already benefiting from existing cash programs were provided with multi-purpose cash assistance to meet their food and non-food needs. Moreover, 1,059 refugee households residing in Tyre, Nabatieh, Marjaayoun, Hasbaya, and Bint Jbeil districts who receive cash assistance for food only were provided \$40 (per household) to cover their non-food needs.
- Since October 2023, 290 farmers (80 in the South and 210 in Nabatieh) were supported with cash assistance to sustain their livelihoods and agricultural assets.

Emergency Cash Assistance for Education:

- As of July, 8,125 IDP children received financial support as emergency cash assistance to reduce barriers to education (including 6,775 attending online and 1,350 attending in person). The final payment for children attending in-person sessions will cover June, while those participating online will receive payment for May by 25 July.

Cash for Protection:

- As of June, 5,539 people received emergency protection cash assistance.

Cash for Shelter:

- Since October 2023, 1,614 Lebanese and 778 Syrian refugees have received cash for shelter assistance.

Basic Assistance

Needs:

- 39,000 pillows, 700 kitchen sets, 2,500 mats, and 1,000 solar lamps are identified as needs by local authorities (DRM/DRR) in Tyre, Zahrani, Nabatieh, and South. Furthermore, the DRR/DRM are requesting additional non-food items such as 61,500 summer bed sheets, 6,800

rechargeable fans for Nabatiyeh DRM, and 27,000 new mattresses for Tyre DRR to replace the previously distributed mattresses.

Response (Since October 2023)

- 239,677 core relief items have been distributed in accessible areas in the Bekaa, South, and Nabatieh governorates.

Gaps & Constraints:

- Increasing need for cash assistance related to increased vulnerabilities specifically among female-headed households, children and persons with disabilities (PWD).
- The Basic Assistance sector is actively coordinating with its partners to update the South geographical split, contingency stocks and warehouse mapping. The geo-split update will reflect both in-kind and cash assistance and current and upcoming planned interventions, as for the contingency stocks update will inform the sector about partners' capacities and available core relief items.

Education

Needs:

- Provision of support to the Ministry of Education and Higher Education (MEHE) in implementing remote learning methods in the next scholastic year 24-25 This includes enhancing teachers' proficiency in digital teaching techniques for approximately 2,000 teachers and educators. Additionally, offer online support for students aged 3-18 years, with around 6,775 attending online classes.
- Support for intensive remedial classes during the summer is crucial for the sector, given that the learning of children from the South has been disrupted for the fifth consecutive year.
- Organize summer activities, including Sports sessions, non-specialized psychosocial support (PSS) and recreational activities, for affected and displaced children in South Lebanon and Nabatieh. This is crucial as 33 percent of IDPs are children under 18 years old.
- There is a crucial need for structured and sustainable interventions that promote child protection, education, and community resilience.

Response (Since October 2023)

- Close to 15,000 school-aged children in MEHE emergency hub schools continued to receive nutritious in-school snacks until the end of the scholastic year on 27 June.
- Around 2,000 teachers from public schools and Technical and Vocational Education and Training (TVET) institutions received essential digital training sessions to enhance their ability to deliver effective online education focusing on inclusivity and gender-sensitive pedagogy
- Nearly 1,225 of the most vulnerable displaced children and those in conflict areas continue to receive both in-person and online retention support to ensure continuity of learning and contribute to their overall well-being.
- Around 5,622 displaced children, through outreach, have been referred to appropriate education services such as non-formal education and recreational support.
- MEHE was supported with 8 school buses to transport students including IDPs from and to official exams centers in Nabatieh escorted by the Lebanese army and in coordination with the regional education office.
- Utilize sector partners' existing facilities, such as community centers, to provide PSS, mental health, and well-being support sessions for children and caregivers.

Gaps & Constraints:

- The ongoing conflict has disrupted normal life for children in South and Nabatieh, leading to interrupted education, increased psychosocial stress, and limited access to recreational activities.
- Displacement-related disruptions contribute to protection and mental health issues affecting student well-being.

- IDPs encounter barriers accessing education, both in-person and online, due to financial, logistical, and psychological challenges.
- Online learners faced unreliable internet and frequent power outages, hindering engagement and comprehension.
- Limited access to reliable internet and devices in border areas exacerbates educational challenges.
- Anticipated dropout rate among children who attended online classes this year is high.
- Anticipated decrease in the number of Grade 12 graduates enrolling in university this year.

Food Security & Agriculture

Needs:

- Food and economic support for the population displaced by the ongoing clashes, individuals remaining in unsafe areas, and individuals whose livelihoods from agriculture have been impacted.

Response (Since October 2023)

People displaced in collective shelters:

- Since the beginning of the conflict until 24 July, over 583,069 meals have been provided to all the IDP households in Tyre and Saida collective shelters. In addition, 2,101 dry food parcels and 2,227 read-to-eat (RTE) meals were provided.
- In Nabatieh collective shelters, 168 dry food parcels and 260 RTE food parcels were distributed among the 69 households displaced.
- In the collective shelter in Bekaa, households hosted in unfinished buildings and informal tented settlements, 31 food parcels were distributed among the displaced. The households hosted in the CS in Rachaya (currently closed) received a fourth round of assistance by the end of June to cover their food needs for July and August.

People displaced and hosted by relatives and households:

- 13,388 food parcels were distributed in the South governorate, including the 3rd round of blanket food assistance.
- 14,463 food parcels were distributed in Nabatieh governorate, including the 4th round of blanket food assistance.
- 7,372 food parcels and 338 food vouchers were distributed in Beirut and Mount Lebanon. 917 food parcels were distributed in Bekaa and Baalbeck-Hermel governorates.
- 8,500 food parcels were distributed in the Nabatieh governorate and Tyre district residing in border villages.
- Two community kitchens (in Rmeich and Souwaneh) were supported with cash and dry food commodities to sustain operations and provision of meals to both IDPs and people remaining in their villages and surrounding villages.

Gaps & Constraints:

- Reduction in reach and transfer value of regular programs is putting further pressure on the food systems and food insecurity of households.
- Scale-up of the food security response for the most vulnerable in terms of food and cash modalities is critical.

Health

Needs:

- Life-saving health interventions to address the immediate needs of the population affected by the conflict, including in border areas.

Response (Since October 2023)

- Twenty-eight primary healthcare satellite units (PSU) on rotation continue to provide integrated primary healthcare services, including childhood vaccination, reproductive health consultations, sexual and reproductive health awareness sessions, and psychological support.
- 87,310 health services have been provided in the PSUs including 18,440 children vaccinated in the south, of whom 5,576 (30 per cent) were vaccinated through the PSU. In addition, 10,604 were supported through psychological first aid (PFA) and 1,059 wound management were provided at the PSUs. Furthermore, key health messages were shared with 90,000 caregivers and their children on maternal health, essential newborn care, immunization, and treatment of childhood illness, and nutrition.
- 19,960 reproductive health services have been provided in satellite Primary Health Care Center (PHCCs) that includes one institutional delivery at the contracted hospital during this reporting period.

Gaps & Constraints:

- Six PHCCs remained closed due to insecurity, three each in Bint Jbeil and Marjaouyn districts.

Nutrition

Needs:

- Lifesaving nutrition services, and supplies addressing the immediate nutritional and child developmental needs of the most vulnerable population, especially children and women.
- Cash assistance to caregivers with difficulty accessing breast milk substitutes and have been identified by infant and young child feeding (IYCF) specialists for eligibility.
- Enhanced referrals to nutrition actors operating in the south and dissemination of the IYCF national hotline widely to limit and control the random requests of formula milk to infants thus affecting their ultimate nutrition of life which is breastfeeding.

Response (Since October 2023)

- Social behavior changes interventions reached 65,689 caregivers inside and outside shelters in South, Nabatieh, and Bekaa governorates promoting optimal IYCF practices, integrated nutrition, and early childhood development (ECD).
- 6,362 children (6-59 months) and pregnant and lactating women (PLW) were screened for acute malnutrition in collective shelters and at the community level and 136 PLW and children have been identified with acute malnutrition and referred to the nearest malnutrition treatment centers to be admitted to the malnutrition in South, Nabatieh, and Bekaa governorates. 868 children under 2 years old were screened using the IYCF rapid assessment tool.
- 9,165 children (6-59 months) in and outside shelters received more than one round of emergency nutrition rations, micronutrient supplements, and complementary feeding packages to enhance the nutritional value of their meals out of which 837 children at the borders were provided with High Energy Biscuits for more than one month to prevent any forms of malnutrition.

Gaps & Constraints:

- Due to lack of funds, two major partners are terminating their response in South and Nabatieh, impeding the continuation and expansion of nutrition activities despite heightened needs.
- Partners have encountered movement restrictions in Hasbaya and Bint Jbeil due to the security situation, with certain municipalities in the south imposing limitations on door-to-door activities.
- Closure of some PHCC's in Marjaayoun and Bint Jbeil, thus affecting nutrition service delivery
- Partners have managed to reallocate only US\$ 500,000 from ongoing programs.

Needs:

- Due to high level of psychological distress amongst children and adults, group and individual psychosocial support (PSS), including practical PSS and parenting skills sessions are needed for the affected families, inside and outside of collective shelters.
- Psychosocial support for front liners, teachers, children and parents in hard-to-reach areas.
- Targeted support for affected women, particularly due to change on family composition where there's emergence of single female-headed households
- Strengthen the community-based Mental Health and Psychosocial Support (MHPSS), through capacity building of community volunteers
- Support for persons living with disabilities and the elderly, especially on information and referrals to specialized services.
- Scaled up outreach to combat period poverty and ensure a continuous supply of menstrual hygiene items.
- Livelihood support programs and social cohesion programs, especially targeting those at heightened risk.
- Awareness raising and risk mitigation activities in view of unexploded ordnance (UXO), especially in border areas.
- Prevention and reintegration support services for children affected by the armed conflict.
- Additional recreational and educational activities including access to online sessions and activities for children affected by the conflict.
- Continuation of provision of emergency cash assistance to prevent, mitigate or reduce the impact or high risk of serious and immediate harm due to an emergency shock or protection threat

Response (Since October 2023)**Legal and Protection Services:**

- 3,509 people participated in legal awareness sessions on topics related to civil documentation, residency, housing landing and property (HLP) and GBV - specific aspects.
- 3,304 people were provided with legal counseling, legal aid, and representation (civil documentation, HLP and residency) including 126 on GBV-specific aspects.
- 344 individuals received protection case management services.
- 78 people participated in protection activities at the community centers.
- 6,013 individuals received group and individual psychosocial support including women and girls.
- 158 people with disabilities received specialized rehabilitation services. 86 people received training on protection and humanitarian principles.

Multi-layered child protection prevention and response services:

- 18,247 individuals participated in information sessions on available services, including child protection, mental health, and the dangers of Landmines, white phosphorus, and explosive remnants of war (ERW).
- A multi-layered package of prevention and response services was provided to children at risk and victims of child protection violations and their caregivers.
- 3,937 children and caregivers were supported with psychosocial support services, both focused and community-based to address their mental health, and psychosocial needs, restore a sense of routine, and empower children to protect themselves and seek support when needed.
- 340 children at risk or victims of violence, abuse, neglect, and exploitation received support through individual case management services and referrals to specialized services including Mental Health Psychosocial support, medical, alternative care, etc.
- Psychological first aid (PFA) training was delivered to 26 children.
- 50,700 explosive ordnance risk education (EORE) IEC materials were distributed in the South for children and adults.
- 38 community members were trained on delivering EORE interventions

GBV Awareness and Response:

- 4,155 girls and women received dignity kits from various GBV actors as part of GBV awareness programs and GBV service provision.
- 3,275 women and girls participated in targeted gender equality, and empowerment activities aiming at social behavioural change in safe spaces or at community level as part of GBV prevention programs.
- 1,191 women and girls received awareness sessions on protection from sexual exploitation and abuse (PSEA), and 738 front liners and humanitarian service providers received PSEA sensitization sessions.
- 1,322 women and girls at risk of GBV received individual case management and psychosocial support.

Gaps & Constraints:

- Ongoing protection risks persist, including physical harm from explosive ordnance and family separation, with concerns about GBV, accessibility for persons with disabilities, and potential SEA for those lacking support.
- Access constraints particularly for hard-to-reach areas: prevailing risk persists in hard-to-reach areas of Hasbaya, Marjaayoun, and Bint Jbeil. Despite reports indicating the presence of targeted beneficiaries in high-risk zones, available support services remain severely constrained. Case management emerges as the primary avenue for psychological and financial assistance. Meanwhile, in South Governorate and Nabatieh City, in-person activities are ongoing, albeit with limitations. The shift to online activities due to safety concerns poses new challenges, particularly in the disclosure of GBV cases, where face-to-face interactions offer a safer environment for survivors to share their experiences.
- Socio-economic constraints, exacerbated by the current conflict and insecurity resulted in increased tensions and power imbalances within households. Households resort to harmful coping mechanisms, such as child marriage, early marriage, or exploitation of women and girls, to mitigate financial strain.
- Discriminatory practices persist, with certain groups facing barriers to accessing collective shelters and vital assistance.
- Increase in restrictive measures and significant delays in appointments for residency renewal and the issuance of civil documentation, due to high demand, limited capacities, strikes among civil registry offices in the southern governorates, and the recent Budget Law, which includes substantially higher legal fees and taxes, is significantly impacting partners' ability to support displaced people in need of legal aid. Budgets for legal services cannot adequately address this significant increase.
- Community engagement, empowerment and recreational activities remain a gap among many other services provided to the displaced populations.
- Displaced women are feeling a lack of privacy that hinders their willingness to share concerns freely. Also, the prioritization of family basic needs may act as a significant barrier to report GBV or access services. In collective shelters, women are concerned about access to clean and safe toilets, as well as continuous access to feminine hygiene products. They are also reluctant to participate in activities organized by GBV actors as they are afraid of the stigma.
- Protection cash assistance continues to be insufficient to meet the needs of IDPs, underscoring its critical importance in supporting housing and facilitating access to basic assistance.
- Needs in hard-to-reach areas are mainly unanswered given the lack of access to those locations.

Shelter and Collective Site Coordination

Needs:

- Alternative accommodation for Syrian households due to constraints faced by displaced Syrian families to access collective shelters in the South.
- Identification of additional sites that could be used as collective shelters across the country, as part of preparedness measures if the situation escalates.

Response (Since October 2023)

- Since the beginning of the response, 18 collective sites have been upgraded by shelter partners (five in Tyre, five in Nabatieh, seven in Hasbaya, and one in Saida). In Tyre district, aid organizations have prepared 16 apartments to accommodate Lebanese IDPs and Syrian secondary displaced.
- Aid organizations are distributing cash for shelter for 1,377 households targeting Lebanese IDPs and Syrian secondary displaced in Tyre, Saida, Bint Jbeil, Marjaayoun and Nabatieh districts.
- Aid organizations are conducting minor rehabilitation and WASH upgrades targeting 51 HHS in Tyre, Saida and Nabatieh.
- A site management and coordination capacity building training was conducted targeting 22 participants to enhance their understanding of site management and coordination, humanitarian response, and how to mainstream protection in displacement sites.

Gaps & Constraints:

- Funding limitations to address gaps in site management within collective sites and to strengthen the government's capacity-building efforts in site management and coordination.
- Limited funding for the cash-for-shelter program, which addresses the needs of displaced families who are residing with host families/ relatives.

Social Stability

Needs:

- Continuous monitoring of tensions arising from displacement movements on both inter-communal and intra-communal levels, to ensure programmatic flexibility and mitigation where possible.
- Continuous monitoring of online tensions and narrative bias around the situation in the South and tracking of possible spillover effects.
- Conflict sensitivity training to frontline staff as well as guidance on conflict-sensitive monitoring & evaluation to counter crisis fatigue.
- Support in providing equipment and vehicles is needed for municipalities to manage solid waste and for public institutions like the Civil Defense center of Bint Jbeil to respond effectively during the ongoing conflicts. This includes necessities such as ambulances, firefighting machinery, hoses, and other essential equipment.

Response (Since October 2023)

Humanitarian Mine Action:

Humanitarian Mine Action partners under the Lebanese Mine Action Center (LMAC) initiated awareness campaigns, videos, and workshops on Explosive Ordnance Risk Education (EORE) and white phosphorus through media and community outreach, including:

- The deployment of 17 EORE teams for awareness raising targeting affected zones and IDPs.
- The installation of 300 billboards on highways (Tyre, Nabatieh, Khaldeh).
- The implementation of two workshops on EORE SOPs and accreditation documents.
- Design of new UXO leaflet for adults and children
- The implementation of training sessions on risk of weapons, mine, and white phosphorus (WP), in Beirut, Tyre, Sarafand, Zehrani, Mount Lebanon and Baalbeck for 261 activists from several organization, the regional school of Humanitarian Demining in Lebanon (including the national steering committee and INGOs), as well as LRC staff, and 30 journalists, in collaboration with the Ministry of Information (MoI) & the ICRC.

The LMAC is also planning additional interventions to raise awareness of key actors, general public as well as targeted capacity building and training courses.

DRM (Disaster Risk Management):

- IT equipment has been provided to the Disaster Risk Reduction (DRR) units in the Union of Municipalities in Tyre, Hasbaya, Marjaayoun, and Bint Jbeil to support the DRM operation rooms.
- Social Stability sector partners supported local development and stability committees, acting as "Conflict Prevention Mechanisms," to implement context-specific community outreach activities.
- Local development and stability committees facilitated awareness sessions in 9 communities, engaging 89 participants on the impact of fake news and fact-checking using the "Sawab" platform.
- Supported by relevant partners, local conflict prevention mechanisms conducted outreach activities reaching 59 teachers in 6 communities and 520 students in affected areas.

Basic Service Delivery by Municipalities & Public Institutions:

- Sector partners supported the municipalities of Abbassieh and Tyre through the provision of trucks to collect additional amounts of solid waste, due to the presence of IDPs.
- The Civil Defense unit in Kharayeb village in the South Governorate was supported with equipment and vehicles.

Water, Sanitation and Hygiene

Needs:

- Increase the contingency stock level for hygiene items.
- Identify potential sites across the country as part of preparedness measures.

Response (Since October 2023)

- WaSH sector partners support individuals displaced in temporary collective shelters, those hosted by other households, and those residing in border areas. Support is also being provided at the water and sanitation systems level, to date mainly through assisting South Lebanon Water Establishment managed systems, through emergency repairs to infrastructure damaged due to hostilities, and through operation and maintenance support to water and wastewater systems.
- From the beginning of the crisis, nearly 46,548 hygiene kits and cleaning items were distributed. This includes 37,515 family hygiene kits, 2,053 menstrual hygiene kits and 1,781 baby kits.
- Almost 440,000 litres of bottled water were distributed, mainly in collective shelters, with some provided in the border areas and hosted IDPs, while 1,893 m³ of water was delivered to collective shelters via water trucking modality.
- The total number of people reached through the system-level support has been estimated at 244,000. The sector partners managed to access the main water station that was damaged due to hostilities and partially restored their functionality. To date, South Lebanon Water Establishment has been supported with seven backup generators, more than 460,000 litres of fuel for different stations in the South and Nabatieh governorates, 30 water tanks (10,000 litres each), five fuel tanks (4,000 litres each), spare parts and other consumables, as well as ad hoc emergency repairs to several stations.

Gaps & Constraints:

- To date, at least 13 water infrastructures have been damaged due to cross-border hostilities, impacting the water supply for nearly 200,000 residents in the South and Nabatieh.
- Water fee collection has fallen to nearly zero in the South and Nabatieh governorates, putting the South Lebanon Water Establishment in a very challenging situation.
- The sector has no funds to replenish hygiene consumables for people displaced outside of collective shelters with a regular, blanket distribution modality approach.

Sectors' Partners

ABAAD, ACF Spain, ACTED, ADRA, Alpha, AMEL, ANERA, AVSI, Beit el Barakah, CARE, Caritas Lebanon, CONCERN, Dar El Efta, DCA, DPNA, DRC, Ghirass for Society Development, Handicap International, I m possible, ICRC, Imam Sadr Foundation, IMC, Intersos, IOCC Lebanon, IOM, IR Lebanon, IRC, ISWA, La Guilde, Lebanese Social Responsibility, LOST, LRC, Makhzoumi, MCC, MDSF, MECC, MEDAIR, MERATH Lebanon, Mercy Corps, Mouvement Social, Nabaa, Nabad, Nation Station, NRC, Nusaned, Order of malta, OXFAM, PCPM, Plan International, PU-AMI, PwC, Sanabel Al Janoub, Save the Children, Sawa blessed, SCI, SHEILD, Solidarités international, Swiss Barakah Charity, TdH-L, Trocaire, UNDP, UNFPA, UNHCR, UNICEF, URDA, WCK, WFP, WVI
